

JOSHUA DALTON

LOGISTICS MANAGER

ABOUT ME

Hello, I'm Joshua Dalton, and I am passionate about logistics management and effective time management. I emphasize optimizing processes and driving effectiveness in each project. Outside of analyzing supply chains, I enjoy hiking, where I gain inspiration and clarity from nature. I believe that, as in logistics, strong planning and time management are key to a satisfying life. I look forward to interacting with co-workers who share my interest in organization and exploration. A fun fact is that I have also spent two years managing logistics operations throughout Eastern Europe.
